

IEEE Code of Ethics

We, the members of the IEEE, in recognition of the importance of our technologies in affecting the quality of life throughout the world, and in accepting a personal obligation to our profession, its members, and the communities we serve, do hereby commit ourselves to the highest ethical and professional conduct and agree:

I. To uphold the highest standards of integrity, responsible behavior, and ethical conduct in professional activities.

1. to hold paramount, the safety, health, and welfare of the public, to strive to comply with ethical design and sustainable development practices, to protect the privacy of others, and to disclose promptly factors that might endanger the public or the environment;
2. to improve the understanding by individuals and society of the capabilities and societal implications of conventional and emerging technologies, including intelligent systems;
3. to avoid real or perceived conflicts of interest whenever possible, and to disclose them to affected parties when they do exist;
4. to avoid unlawful conduct in professional activities, and to reject bribery in all its forms;
5. to seek, accept, and offer honest criticism of technical work, to acknowledge and correct errors, to be honest, and realistic in stating claims or estimates based on available data, and to credit properly the contributions of others;
6. to maintain and improve our technical competence and to undertake technological tasks for others only if qualified by training or experience, or after full disclosure of pertinent limitations;

II. To treat all persons fairly and with respect, to avoid harassment or discrimination, and to avoid injuring others.

7. to treat all persons fairly and with respect, and to not engage in discrimination based on characteristics such as race, religion, gender, disability, age, national origin, sexual orientation, gender identity, or gender expression;
8. to not engage in harassment of any kind, including sexual harassment or bullying behavior;
9. to avoid injuring others, their property, reputation, or employment by false or malicious actions, rumors, or any other verbal or physical abuses;

III. To strive to ensure this code is upheld by colleagues and co-workers.

10. to support colleagues and co-workers in following this code of ethics, to strive to ensure the code is upheld, and to not retaliate against individuals reporting a violation.

SOCIETY POLICY

ETHICS

ASME requires ethical practice by each of its members and has adopted the following Code of Ethics of Engineers as referenced in the ASME By-Law B2.1.

CODE OF ETHICS OF ENGINEERS

The Fundamental Principles

Engineers uphold and advance the integrity, honor, and dignity of the engineering profession by:

- I. using their knowledge and skill for the enhancement of human welfare;
- II. being honest and impartial, and serving with fidelity their clients (including their employers) and the public; and
- III. striving to increase the competence and prestige of the engineering profession.

The Fundamental Canons

1. Engineers shall hold paramount the safety, health, and welfare of the public in the performance of their professional duties.
2. Engineers shall perform services only in the areas of their competence; they shall build their professional reputation on the merit of their services and shall not compete unfairly with others.
3. Engineers shall continue their professional development throughout their careers and shall provide opportunities for the professional and ethical development of those engineers under their supervision.
4. Engineers shall act in professional matters for each employer or client as faithful agents or trustees and shall avoid conflicts of interest or the appearance of conflicts of interest.
5. Engineers shall respect the proprietary information and intellectual property rights of others, including charitable organizations and professional societies in the engineering field.
6. Engineers shall associate only with reputable persons or organizations.

7. Engineers shall issue public statements only in an objective and truthful manner and shall avoid any conduct which brings discredit upon the profession.
8. Engineers shall consider environmental impact and sustainable development in the performance of their professional duties.
9. Engineers shall not seek ethical sanction against another engineer unless there is good reason to do so under the relevant codes, policies and procedures governing that engineer's ethical conduct.
10. Engineers shall, in all matters related to their profession, treat all persons equitably and encourage and support participation by all in accordance with Policy P-15.11 "Diversity, Equity and Inclusion" and shall not engage in discrimination or harassment in accordance with Policy P-15.9 "Policy Against Discrimination (Including Discriminatory Harassment)".
11. Engineers who are members of the Society shall abide by the Constitution, By-Laws, and Policies of the Society, and they shall disclose knowledge of any matter involving another member's alleged violation of the Policies of the Society in a prompt, complete and truthful manner to either the Executive Director/CEO or any member of the Executive Committee of the Board of Governors or ASME Human Resources who shall promptly notify the full Executive Committee. The Executive Committee shall initially determine whether the alleged conduct shall be addressed through this Policy or Policy 15.4 "Ethical Conduct Violation Procedures" or Policy 15.8 "Conflicts of Interest" or Policy 15.9 "Policy Against Discrimination (Including Discriminatory Harassment) – Members" or Policy 15.14 "Code of Conduct." There may be situations where actions are taken pursuant to one or more Society Policies.

The Ethics Committee maintains an archive of interpretations to the ASME Code of Ethics (P-15.7). These interpretations shall serve as guidance to the user of the ASME Code of Ethics and are available on the Committee's website or upon request.

Association for Computing Machinery - ACM Code of Ethics and Professional Conduct

(this is a shortened version of the [full code of ethics](#)) Copyright (c) 2018 by the Association for Computing Machinery.

1. General ethical principles

- 1.1 Contribute to society and to human well-being, acknowledging that all people are stakeholders in computing.
- 1.2 Avoid harm
- 1.3 Be honest and trustworthy
- 1.4 Be fair and take action not to discriminate
- 1.5 Respect the work required to produce new ideas, inventions, creative works, and computing artifacts
- 1.6 Respect privacy
- 1.7 Honor confidentiality

2. Professional responsibilities

- 2.1 Strive to achieve high quality in both the processes and products of professional work
- 2.2 Maintain high standards of professional competence, conduct, and ethical practice
- 2.3 Know and respect existing rules pertaining to professional work.
- 2.4 Accept and provide appropriate professional review.
- 2.5 Give comprehensive and thorough evaluations of computer systems and their impacts, including analysis of possible risks.
- 2.6 Perform work only in areas of competence.
- 2.7 Foster public awareness and understanding of computing, related technologies, and their consequences
- 2.8 Access computing and communication resources only when authorised or when compelled by the public good
- 2.9 Design and implement systems that are robustly and usably secure.

3. Professional leadership principles

- 3.1 Ensure that the public good is the central concern during all professional computing work.
- 3.2 Articulate, encourage acceptance of, and evaluate fulfillment of social responsibilities by members of the organization or group.
- 3.3 Manage personnel and resources to enhance the quality of working life.
- 3.4 Articulate, apply, and support policies and processes that reflect the principles of the Code.
- 3.5 Create opportunities for members of the organization or group to grow as professionals.
- 3.6 Use care when modifying or retiring systems.
- 3.7 Recognize and take special care of systems that become integrated into the infrastructure of society.

4. Compliance with the code

- 4.1 Uphold, promote, and respect the principles of the Code.
- 4.2 Treat violations of the Code as inconsistent with membership in the ACM.

STAND UP FOR WHAT'S RIGHT

Code of Ethical Conduct

- 1 Protect people's health and safety
- 2 Consider the environment
- 3 Report adverse consequences
- 4 Act competently
- 5 Behave appropriately
- 6 Warn about ignoring advice
- 7 Maintain confidentiality
- 8 Report significant breaches

Code of Ethics

As engineering practitioners, we use our knowledge and skills for the benefit of the community to create engineering solutions for a sustainable future. In doing so, we strive to serve the community ahead of other personal or sectional interests.

Our Code of Ethics defines the values and principles that shape the decisions we make in engineering practice. The related Guidelines on Professional Conduct provide a framework for members of Engineers Australia to use when exercising their judgment in the practice of engineering and as members of Engineers Australia more broadly.

As members of Engineers Australia, we commit to practise in accordance with the Engineers Australia's General Regulations regarding competency, continuing professional development and the Code of Ethics. We accept that we will be held accountable for our conduct under Engineers Australia's disciplinary regulations.

In the course of engineering practice we will:

1

Demonstrate integrity

- 1.1 Act on the basis of a well-informed conscience
- 1.2 Be honest and trustworthy
- 1.3 Respect the dignity of all persons.

2

Practise competently

- 2.1 Maintain and develop knowledge and skills
- 2.2 Represent areas of competence objectively
- 2.3 Act on the basis of adequate knowledge.

3

Exercise leadership

- 3.1 Uphold the reputation and trustworthiness of the practice of engineering
- 3.2 Support and encourage diversity
- 3.3 Make reasonable efforts to communicate honestly and effectively to all stakeholders, taking into account the reliance of others on engineering expertise.

4

Promote sustainability

- 4.1 Engage responsibly with the community and other stakeholders
- 4.2 Practise engineering to foster the health, safety and wellbeing of the community and the environment
- 4.3 Balance the needs of the present with the needs of future generations.
