

Some useful material building on this morning's workshop

1. Download Git for your own machine:

<https://git-scm.com/>

2. ECE Wiki – for lots of useful information:

<http://ecewiki.elec.canterbury.ac.nz>

Specifically related to Git:

<http://ecewiki.elec.canterbury.ac.nz/mediawiki/index.php/Git>

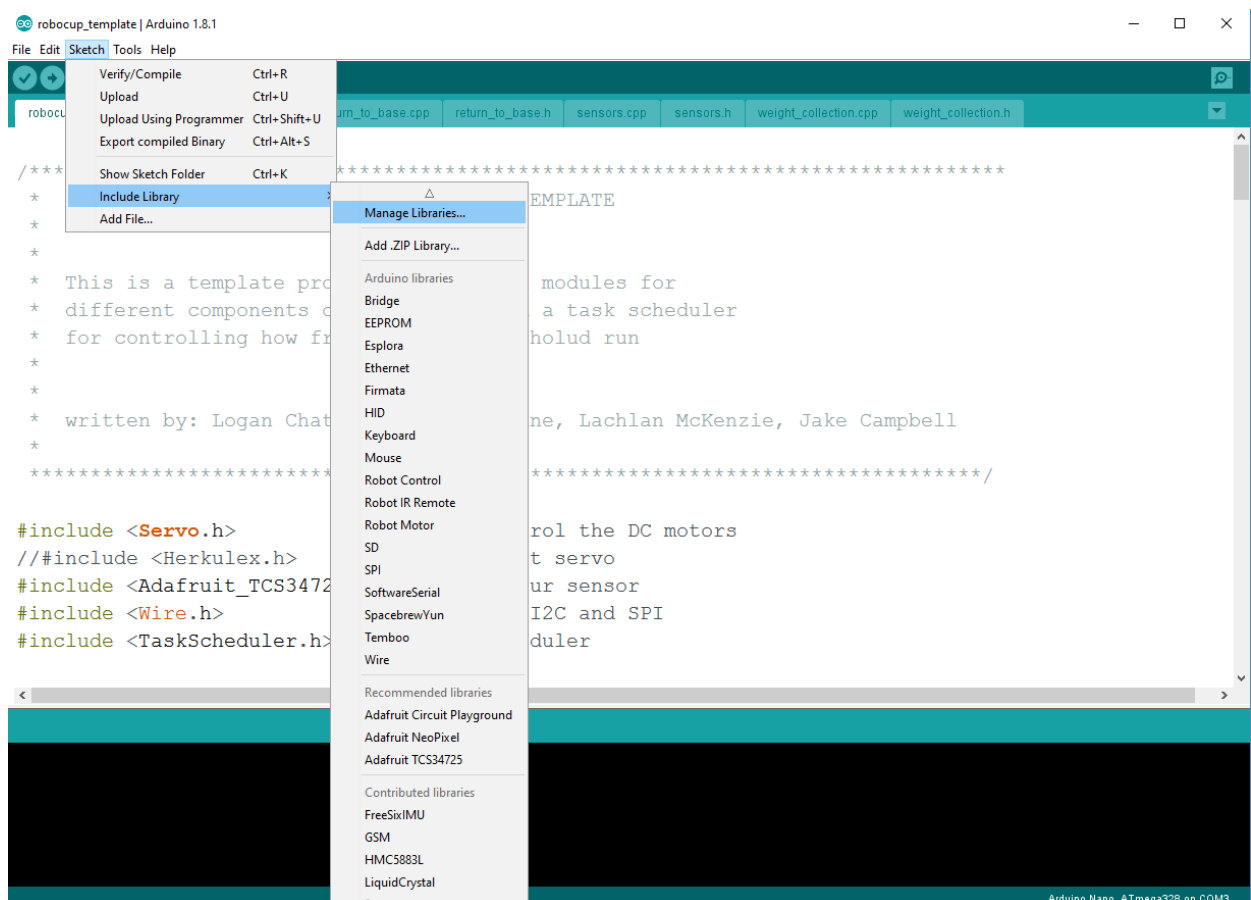

http://ecewiki.elec.canterbury.ac.nz/mediawiki/index.php/Git_for_beginners

3. To compile the code in the template, you'll need to install 2 libraries:

- a. TaskScheduler
- b. Adafruit TCS34725

To install these, from inside the Arduino IDE go to:

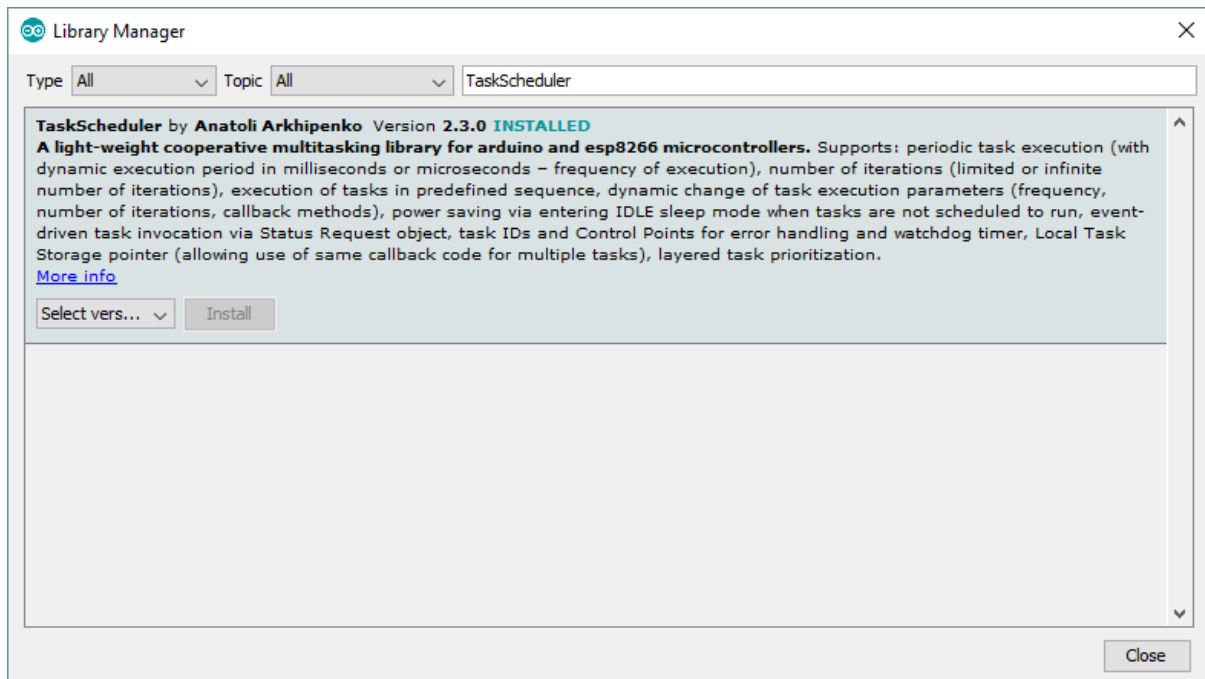

Sketch > Include Library > Manage Libraries...

Search for *TaskScheduler* in the search box.

You should only get one result – *TaskScheduler* by Anatoli Arkhipenko (v2.3)

Click in the box to select, then click *Install*

Repeat for *Adafruit TCS34725*.

Now the template should compile and run
